## MOBILE CARE GROUP ANNOUNCES NEW OXYGEN SERVICES

**Sylvania, OH, January 27, 2016** – Locally owned and operated Mobile Care Group (MCG) launches a new company to manufacture and deliver oxygen, in cylinders, for wholesale medical use. The newly formed company, Mobile Oxygen Services, LLC (MOS), will fill the oxygen needs of MCG’s medical transportation business and other private ambulance companies. Additionally, the company will provide services to local Long Term Care and Assisted Living facilities, whose residents utilize portable cylinders. Future plans include supplying home and Hospice care patients.

A highly efficient oxygen filling system is being installed at the company’s headquarters in Sylvania, Ohio. The large capacity system will allow MOS to fill and deliver multiple cylinder sizes to a wide variety of users. The logistics of oxygen filling operations, combined with medical transportation services, provides a unique efficiency to the marketplace, and will provide innovative cost savings opportunities to the customer base.

*“Once operational, Mobile Oxygen Services will be the only such company in the Toledo Metropolitan area. We believe we will be the most efficient medical oxygen supply company providing timely, consistent delivery to customers,”* commented Mark Sears, President of MOS. *“We are driving costs out of the manufacturing and delivery process, therefore our customers will benefit through enhanced service, improved price, or both,”* concluded Sears.

*“This scenario secures a local and affordable oxygen supply for our transport business, and indeed, all of our customers,”* added Joe Wallace, President of MCG. *“We are happy to extend to our customers every advantage this unique situation offers to the marketplace.”*
